FR 2915
Report of Foreign (Non-U.S.) Currency Deposits

Federal Reserve System

STATISTICS FUNCTION
October 2026

Overview

This document provides the required file format for submitting the data via Reporting Central and shows how a reporting institution can create the file from a spreadsheet for the **FR 2915 – Report of Foreign (Non-U.S.) Currency Deposits**. Formulas were used to pull the data from the spreadsheet worksheets containing the data and format them for transmission to Reporting Central.

How to create a text file from a spreadsheet for the FR 2915

The FR 2915 is comprised of one schedule and several financial and text fields. To minimize issues arising during the creation of the Reporting Central text file, it is strongly recommended reporting institutions follow the process described below.

Field Labels

The identifying label for both financial and text data is the eight-character MDRM descriptor listed in Appendix A. Reporting Central uses the MDRM to identify individual report items in the file upload.

Appendix A

FR 2915 Report Detailed Field Specifications

Report Form Line Number	Item	8-character MDRM
Financial Data Items		
[checkbox]	No foreign currency deposits Indicate '1' if your institution had no foreign (non-U.S.) deposits at your U.S. offices on every day of reporting week. Otherwise, please complete the entire report.	FCDQH020
1.	Demand deposits due to the public	FCDQ2340
2.	Other liquid deposits	FCDQMB60
3.	Cash items in process of collection	FCDQ0020
4.	Small time deposits	FCDQ2697
Text Items		
	Name of Reporting Institution	FCDQ9017
	Address of Reporting Institution	FCDQ9028
	City of Reporting Institution	FCDQ91

Field Values

Financial data fields can have either positive, zero, or null values.

Financial Data Item Value	Format
Positive	[leave value as is]
Zero	0
Null (or blank)	[leave blank]

Step 1 – Create Data Listing

Since it is presumed that the reporter already has the report data in spreadsheet format, all subsequent steps in this guide are based on using this report data as the source. The first step recommended is to create a sequential listing of all the items containing the item number, the eight-character MDRM, item description, and item value.

It is easier if you list all of the financial data items first and then the text items after that.

NOTE Adding additional information to this spreadsheet (like item description and item number) can make items easier to identify and help troubleshoot potential problems. However, this information is completely optional.

Step 2 – Link and Format Data Cells

In Sheet 2 of the workbook, all of the financial and text items will be linked to Sheet 1 and formatting characters inserted to aid in the creation of the final text file.

Data Format for Financial Data Items

- "L" is the separator between data items.
- Eight-character MDRM.
- "+" represents the maximum number of columns on the report form into which financial data can be entered for one MDRM. For FR 2915, the maximum number of columns is one. The formula for each financial item must contain only one "+".
- Financial data displays after each "+".

Financial Data Excel formula: `="L"&Sheet1!E10&"+"&Sheet1!L10`
Translates to: `LFCDQ2340+100`

Data Format for Text Items

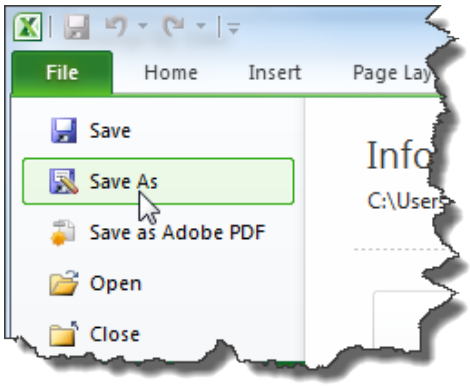

- "L" is the separator between data items.
- Eight-character MDRM.
- Text data entry is preceded by two underscores and followed by two underscores.

Text Data Excel formula: `="L"&Sheet1!E18&"__"&Sheet1!L18&"__"`
Translates to: `LFCDQ9130__Your City__`

The above is repeated for all financial data and text items. Once all fields have been linked, you can create the text file.

Step 3 – Create the Text File

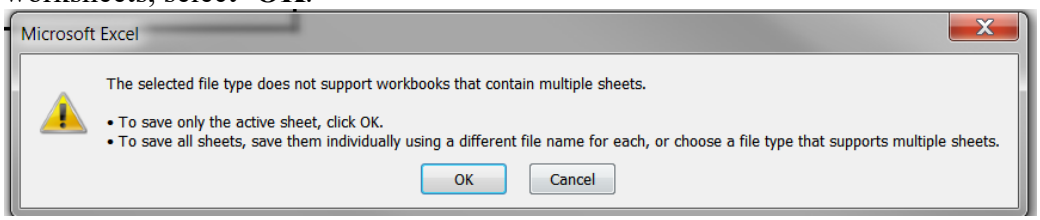

After saving the file in spreadsheet format the text file can be created by first navigating to the **File tab**.

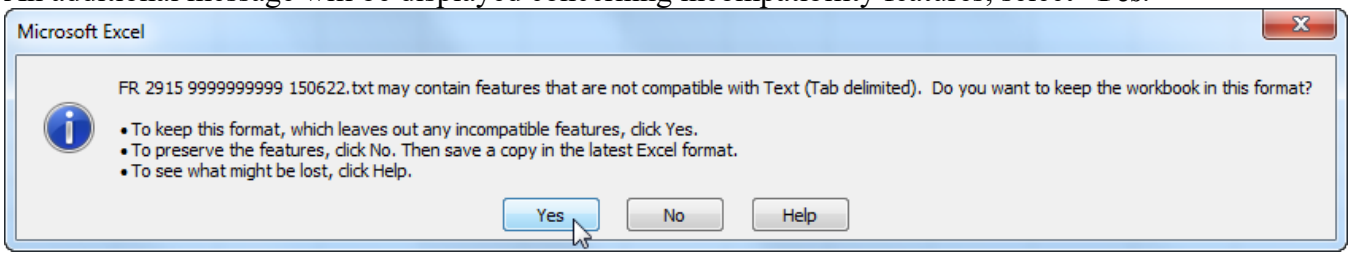

Then selecting the '**Save As**' option and indicating the file type as '**Text (Tab delimited) (*.txt)**.'

If a message appears indicating that this file selection does not support workbooks with multiple worksheets, select '**OK**.'

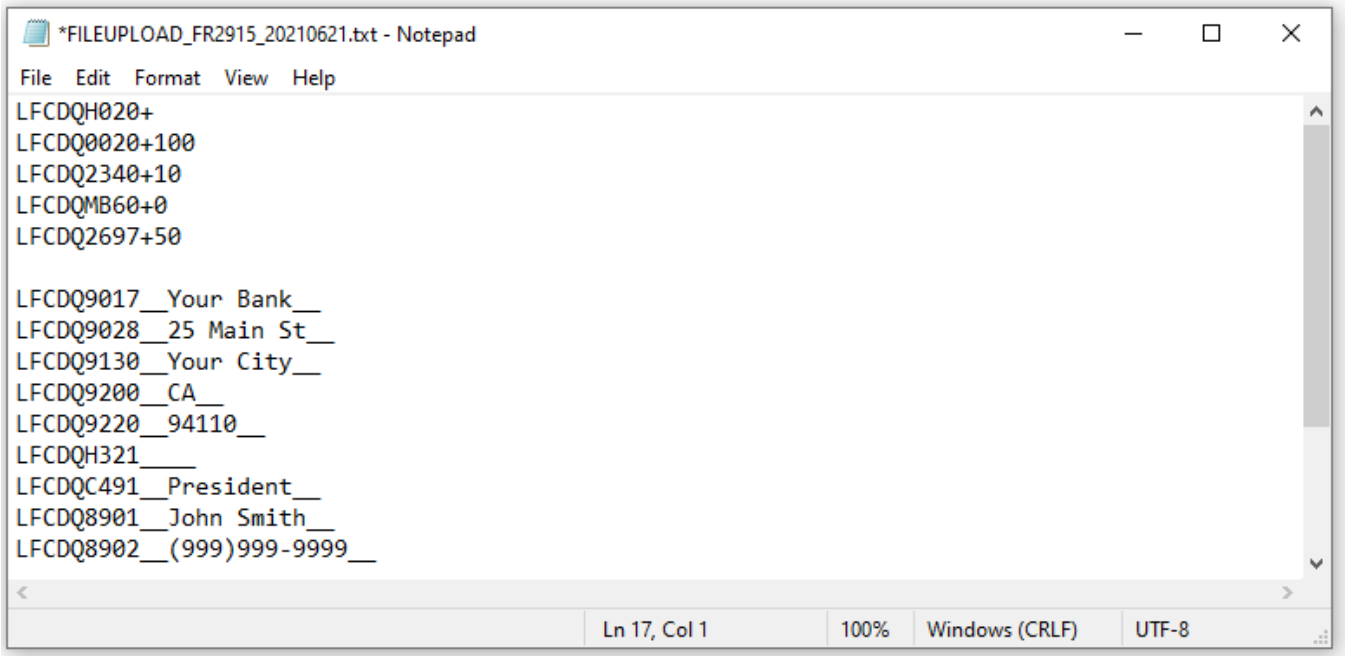

An additional message will be displayed concerning incompatibility features, select '**Yes**.'

Step 4 – Format the Text File and Add Header Record

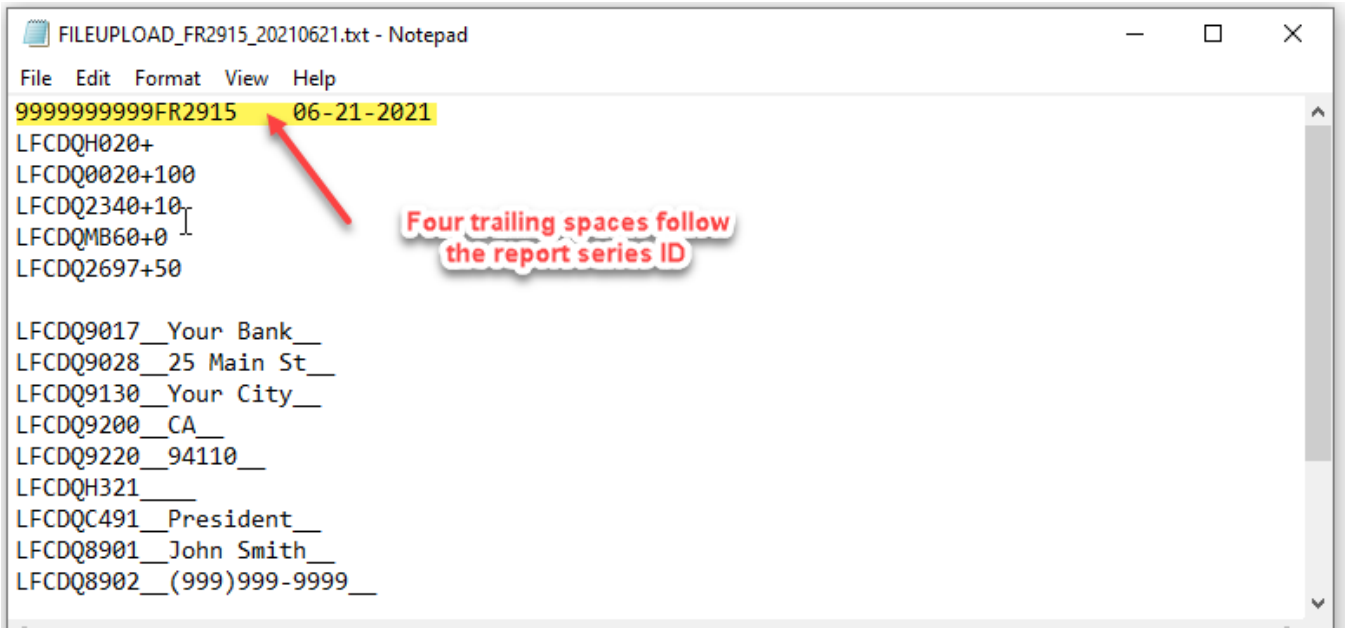

The text file you created will look like this.

The next step is to add the header record as the first line.

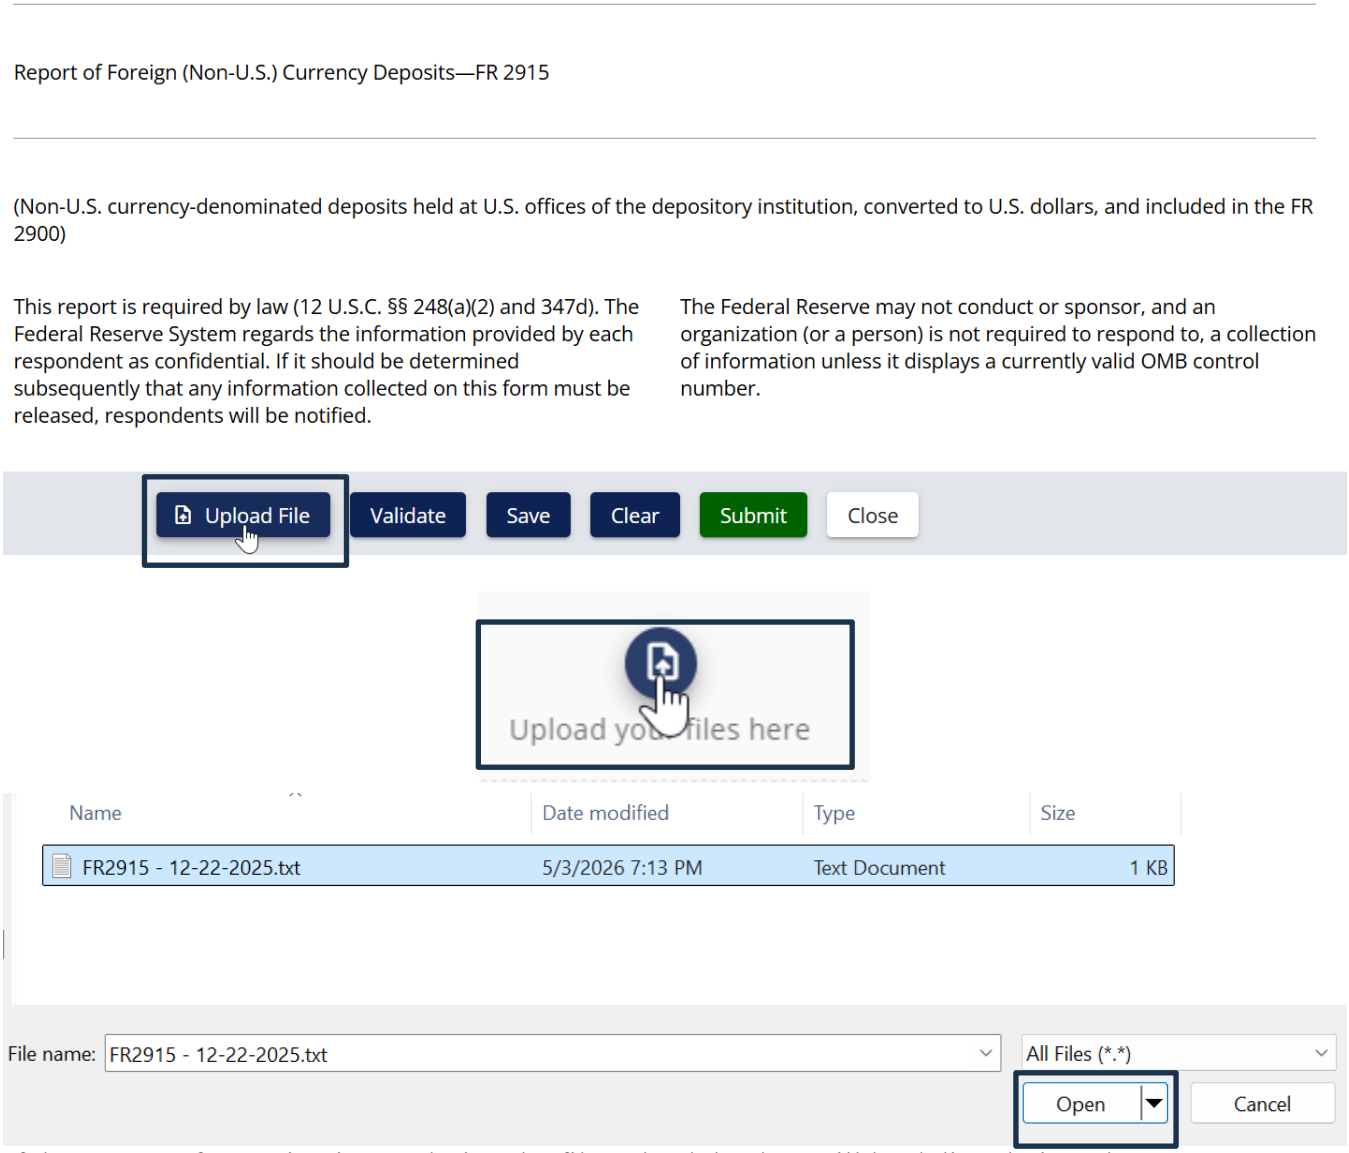

The file header record consists of the following items:

- the first 10 spaces are the RSSD ID with leading zeroes
- the next 10 spaces are the report series ID 'FR2915,' plus four trailing spaces
- the report as-of date, in MM-DD-YYYY format

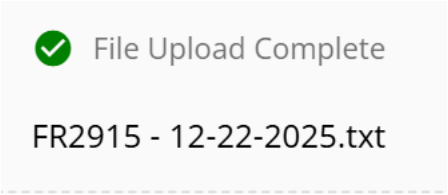

Step 5 – Reporting Central Submission

In Reporting Central, select the File Upload tab and then click the ***Browse…*** button. Then, navigate to the stored text file and select the filename so it appears in the ***File:*** box. Select ***Open*** to choose the file. In Reporting Central, select ***Continue*** to upload the file.

If there are no formatting issues during the file upload the data will load directly into the report screen.

The report data can then be validated and saved. If errors exist in the text file error messages will appear in the file upload window, which can be used to troubleshoot any formatting issues.
