FR 2886b
Consolidated Report of Condition and Income for Edge and Agreement Corporations

Federal Reserve System

Statistics Function
August 2026

Overview

The Federal Reserve System's Reporting Central Application provides the ability to submit spreadsheet files (e.g., Microsoft Excel) via the internet. As a result, reporting institutions that use a spreadsheet to prepare their data will not have to key their data into a web page form. While this feature was provided for reporting institutions using spreadsheets, the file can be created by any other backend system that a reporting institution uses to generate its data.

This document provides the required file format for submitting the data via Reporting Central and shows how a reporting institution can create the file from a spreadsheet for the ***FR 2886b—Consolidated Report of Condition and Income for Edge and Agreement Corporations***. Formulas were used to pull the data from the spreadsheet worksheets containing the data and format them for transmission to Reporting Central.

Update – August 2026: Transition from Pseudo MDRMs to Actual MDRMs

As part of the series migration to Reporting Central in the Cloud (August 2026), we are implementing a change to MDRM usage.

Background: Due to system limitation in the legacy Reporting Central application, pseudo MDRMs for a few items were used instead of actual MDRMs. The Cloud platform eliminates this limitation, for most items. Two items on Schedule D, Item 9 and 13 will continue to use pseudo MDRMs and will be noted in the tables below.

What's Changing: This requirement applies retroactively to all submissions from this date forward. Effective March 31, 2024 as-of date, all submissions and revisions must use actual MDRMs rather than pseudo MDRMs, except where noted.

Impacted MDRMs: Below is a list of MDRMs affected by this change. Listed are the previously used pseudo MDRMs and the actual MDRMs that should be used.

Item	Description	Schedule	Pseudo MDRM	Actual MDRM
2	Net income (loss) (equals Schedule RI, item 12)	RI-A	IESB4340	RIAD4340

How to create a text file from a spreadsheet for the FR 2886b

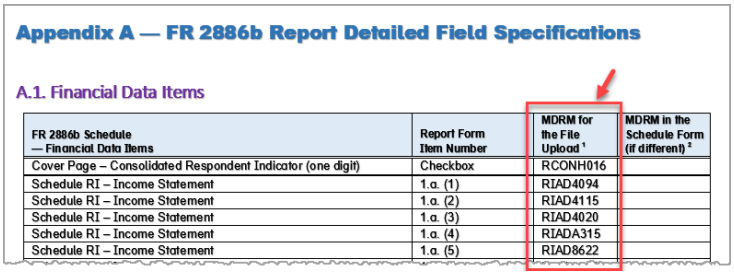

The FR 2886b is comprised of multiple schedules and several hundred financial and text fields. To minimize issues with problems arising during the creation of the Reporting Central text file, it is strongly recommended reporting institutions follow the process described below.

NOTE Only one file upload can be submitted for each individual respondent and as of date. It is no longer possible to submit multiple branches or agencies in a single file.

Field Labels

The identifying label for both financial and text data is eight-character MDRM descriptor listed in ***Appendix A***.

Reporting Central uses the 8-character **MDRM** to identify individual report items. For File Upload, Reporting Central allows you to use either the **Reporting Central format** or the **CIPS format**.

Appendix A — FR 2886b Report Detailed Field Specifications

A.1. Financial Data Items

FR 2886b Schedule — Financial Data Items	Report Form Item Number	MDRM for the File Upload [1]	MDRM in the Schedule Form (if different) [2]

Schedule RI – Income Statement	1.a. (5)	RIAD8622	

Field Values

Financial data fields can have either positive, negative, zero, or null values. These values are formatted differently in the Reporting Central and CIPS upload files.

Table 1. Format Differences for Financial Data Item Values

Financial Data Item Value	Reporting Central Format	CIPS Format
Positive	[leave value as is]	Precede by plus (+) sign
Negative	Precede by minus (-) sign	Precede by minus (-) sign
Zero	0	+0
Null (or blank)	[leave blank]	-0

Step 1 – Create Data Listing

Since it is presumed that the reporter already has the report data in spreadsheet format, all subsequent steps in this guide are based on using this report data as the source. The first step recommended is to create a sequential listing of all the items containing the item number, the eight-character MDRM, item description, and item value.

It is easier if you list all the financial data items first and then the text items after that.

Both the **Reporting Central file format** and the **CIPS file format** use the eight-character MDRM (see *Column E* below).

NOTE Adding additional information to this spreadsheet (like item description and item number) can make items easier to identify and help troubleshoot potential problems. However, this information is completely optional.

Step 2 – Link and Format Data Cells

In Sheet 2 of the workbook, all the financial and text items will be linked to cells in Sheet 1 and formatting characters inserted to aid in the creation of the final text file. Note that the formatting of item values in the **Reporting Central upload file** differs from that of the **CIPS upload file**.

RC Format —Sheet 2
will look like this:

	A	B	C	D	E
1	="L"&Sheet1!E8&"+"&Sheet1!G8				
2	="L"&Sheet1!E9&"+"&Sheet1!G9				
3	="L"&Sheet1!E10&"+"&Sheet1!G10				
4	="L"&Sheet1!E11&"+"&Sheet1!G11				
5	="L"&Sheet1!E12&"+"&Sheet1!G12				
6	="L"&Sheet1!E13&"+"&Sheet1!G13				
7	="L"&Sheet1!E14&"+"&Sheet1!G14				
8	="L"&Sheet1!E15&"+"&Sheet1!G15				

CIPS Format —Sheet 2
will look like this:

	A	B	C	D
1	=Sheet1!E8&"+"&Sheet1!G8&","			
2	=Sheet1!E9&"+"&Sheet1!G9&","			
3	=Sheet1!E10&"+"&Sheet1!G10&","			
4	=Sheet1!E11&"+"&Sheet1!G11&","			
5	=Sheet1!E12&"+"&Sheet1!G12&","			
6	=Sheet1!E13&"+"&Sheet1!G13&","			
7	=Sheet1!E14&"+"&Sheet1!G14&","			

This code is repeated for all fields. Once all fields have been linked, you can create the text file.

Reporting Central – Data Format

- "L" is the separator between data items.
- Eight-character MDRM.
- "+" represents the maximum number of columns on the report form into which financial data can be entered. If a report section contains a smaller number of columns than another section that has the maximum number, each item still must contain the maximum number of +'s.
- Financial data is entered after each "+".
- Text data entry is preceded by two underscores and followed by two underscores.

For Example
Reporting Central Financial Data Excel Formula: `="L"&Sheet1!E8&"+"&Sheet1!G8`
Translates to: `LRIAD4094+100`

Reporting Central Text Data Excel Formula: `="L"&Sheet1!E1026&"__"&Sheet1!G1026&"__"`
Translates to: `LTEXTC490__John Smith__`

CIPS – Data Format

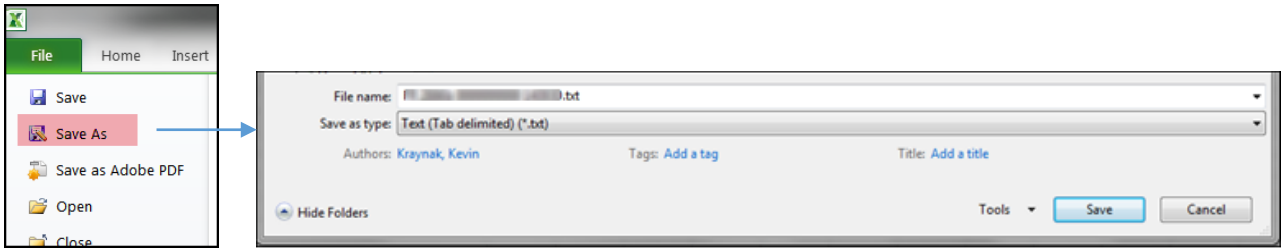

- Data items are separated by commas.
- Eight-character MDRM.
- "+" is placed between the MDRM and the data value.
- Null values are represented by "-0" and are not preceded by the "+" sign.
- Text data values are preceded by a single underscore and followed by two underscores

For Example
CIPS Financial Data Excel Formula: `=Sheet1!E8&"+"&Sheet1!G8&","`
Translates to: `RIAD4094+100,`

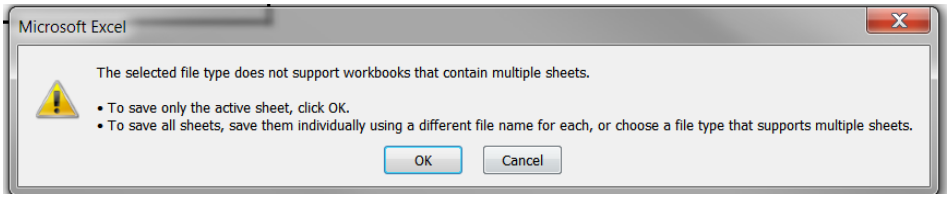

CIPS Text Data Excel Formula: `=Sheet1!E1026&"+_"&Sheet1!G1026&"__,"`
Translates to: `TEXTC490+_John Smith__,`

Step 3 – Create the Text File

After saving the file in spreadsheet format the text file can be created by first navigating to the File tab. Then selecting the 'Save As' option and indicating the file type as 'Text (Tab delimited) (*.txt).'

A message will appear indicating that this file selection does not support workbooks with multiple worksheets, select 'OK.'

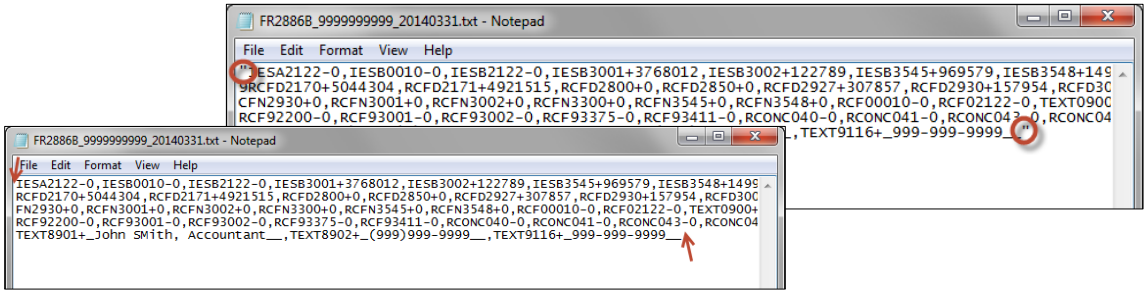

An additional message will be displayed concerning incompatibility features, select 'Yes.'

Step 4 – Format the Text File and Add Header Record

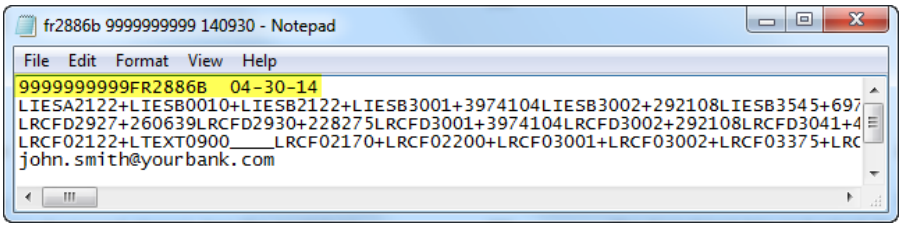

The text file will have been created and will look like this (the example shows the CIPS upload file, but the Reporting Central format will look similar except for the formatting differences discussed above). If the generation of this file includes quotation marks (see below) at the beginning and the end of the file, you will need to remove them before continuing.

The next step is to add the header record.

The **Reporting Central file header** record consists of the following items:

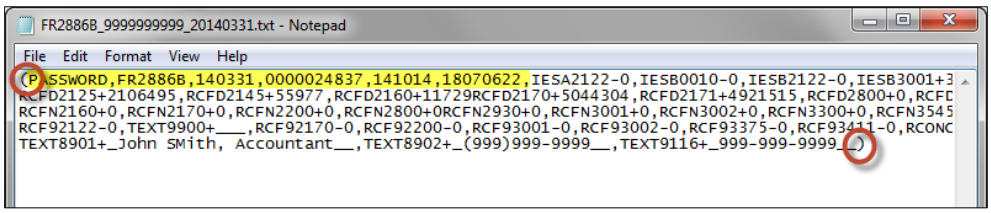

- the first 10 characters are the RSSD ID with leading zeroes
- the next 10 characters are the report series name **FR2886B**, followed by three spaces
- the report as-of date, in MM-DD-YYYY.

The **CIPS file header record** consists of the following items, all separated by a comma (“,”):

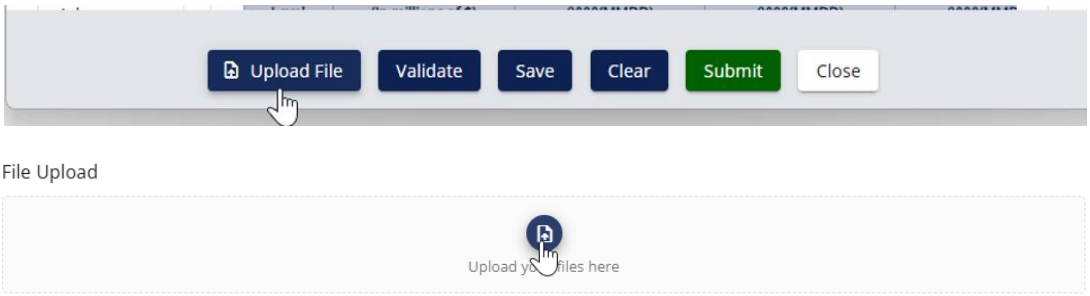

- the series password that is provided by the Federal Reserve Bank analyst—it must be exactly eight characters in length and spaces should be inserted if the actual password is shorter. If a password is not provided by the Federal Reserve, then the word “PASSWORD” or any 8 character word of your choosing can be used.
- the report series name **FR2886B**
- the report as-of date, in YYMMDD format
- the reporter RSSD ID—it must be ten digits in length and should be prefixed by leading zeroes if shorter
- the date stamp, in YYMMDD format
- the time stamp, in HHMMSS format, then add two zeroes at the end.

The final step in formatting the CIPS file is to enclose the entire file in parentheses by inserting a left parenthesis at the beginning of the file and a right parenthesis at the end of the file.

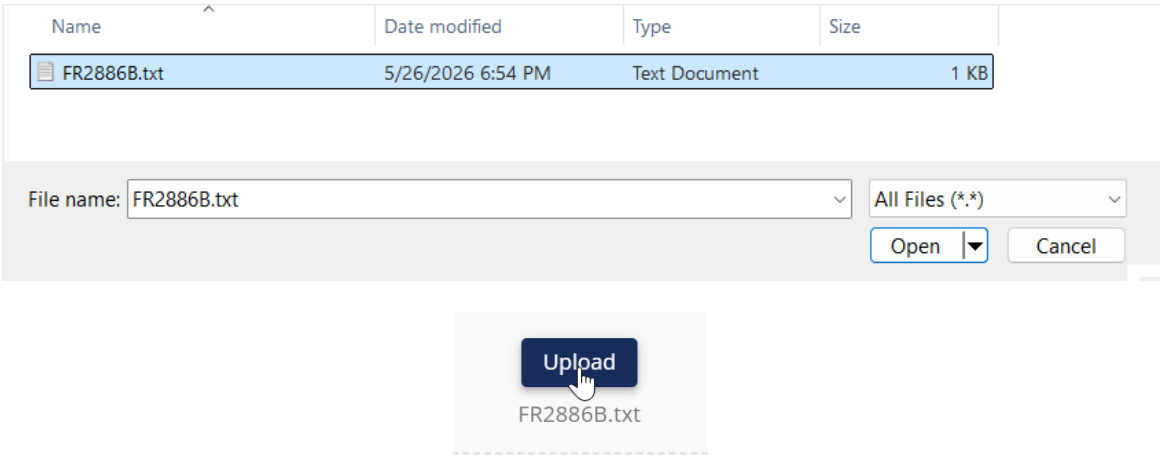

Step 5 – Reporting Central Submission

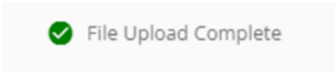

In Reporting Central, select the "Upload file" tab and then click the "Upload your files here" tab.

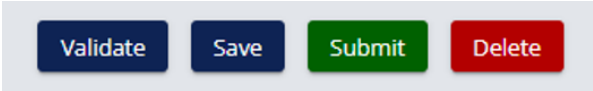

Then, navigate to the stored text file and select the filename so it appears in the 'File name:' box. Select "Open" to continue and then hit the "Upload" button.

If there are no formatting issues during the file upload you will get a "File Upload Complete" message the data will load directly into the report screen.

The report data can then be validated, saved, submitted or deleted. If errors exist in the text file error messages will appear in the file upload window, which can be used to troubleshoot any issues.

Appendix A — FR 2886b Report Detailed Field Specifications.

Note: Highlighted in yellow are MDRMs that appear on the report twice but should be only reported once in the upload file. The data will be populated into all matching line items by the system.
